## Good news from China!

**Leonardo Longo**

*International Academy for Laser in Medicine and Surgery, Florence; eCampus University, Novedrate; Editor-in-Chief of Laser Therapy, Italy*

**Key words:** Chinese Association for Laser in Medicine and Surgery (CALMS); laser basic principles and applications; Laser Therapy.

It is a great pleasure to inform you that this November, the Chinese Association for Laser in Medicine and Surgery (CALMS) was officially founded in Shijiazhuang. This represents a great accomplishment obtained thanks to the great job of Prof. Jean-Paul Rocca who, several years ago, started to teach the laser basic principles as well its applications in medicine, dentistry and surgery to the Chinese practitioners.

The members of CALMS elected Prof. Huichao Wang, the director of Dental Department in Shijiazhuang 2<sup>nd</sup> Hospital as their president. Prof. Wang guides a team of researchers and clinicians, who have already published several papers and studies, many of which are in our journal.

Prof. Wang and her collaborators are very honoured and happy to be part of the ISLMS family, they will participate in the Laser Florence 2025, and they have proposed to host the 2027 Congress of ISLMS in China. The Board of *Laser Therapy* congratulate the members of the new Association and thanks Prof. Rocca for his great and successful job.

Prof. Huichao Wang, President of CALMS, with Prof. Carlo Fornaini, President Elect of ISLMS.
